

Product Information

NEVER SHOCK

Description

This product is specially formulated to reduce accumulation of static electricity in carpets during periods of low humidity.

CAUTION: Always test on obscure small portion of carpeting before spraying to make certain the carpet dyes are not affected adversely.

Lay out area to be sprayed in approximate premeasured amounts, so spray is applied evenly. This is not critical, but does result in a more uniform application, with more satisfactory results.

Carpets sprayed with this product show effects for as long as six weeks, although this will vary with amount of traffic, and heat and humidity conditions.

Do not dampen carpeting excessively. Two light applications, with dry-time between applications, gives better and longer lasting results than one heavy application.

Spray carpeting at a time when it can be allowed to dry for approximately two hours before heavy traffic resumes.

Directions

If carpeting is to be cleaned, always clean prior to applying anti-static compound.

This product is ready-to-use, and may be sprayed on carpeting with a power sprayer, compressed air pump type sprayer, or even a hand-operated trigger sprayer with nozzle adjusted to give wide area coverage.

One pint of this ready-to-use spray (16 oz.) will treat 16 square yards of thick, dense pile carpeting (144 sq. ft.).

On medium to light pile carpeting, one pint of this ready-to-use spray will treat up to 40 square yards of carpeting (360 sq. ft.).

WARNING: SKIN ANDEYE IRRITANT. Contains Quaternary, Surfactant, and Isopropyl Alcohol. Do not get in eyes, on skin or clothing. Harmful if swallowed. Do not take internally.

FIRST AID: For eyes, flush immediately with plenty of water for at least 15 minutes and get medical attention. For skin, wash thoroughly with water. If irritation persists, see a doctor. If swallowed, drink large quantities of water or milk. Get medical attention immediately.

Specifications

Type product	Cationic anti-static agent
Weight per gallon	8.18 lbs.
Percent solids	2.2 ± 0.5
Appearance	Opaque white
Odor	None
Viscosity (Gardner-Holdt tube)	Less than A-1
Miscibility	In all proportions with water
Freeze/thaw stability	Passes 3 cycles
pH	5 - 7
Coverage	1152 sq. ft. per gal.
